

MB4966B

Bar Stool with Metal Base

A curved wraparound backrest and clean plain back give this bar stool a modern, supportive feel at the bar or high-top. Hardwood plywood construction with multiple bonded wood veneers helps keep the frame structurally stable and resistant to splitting and warping, while a solid deck seat stays very firm and durable. High-density polyurethane foam adds resilient comfort, and the cantilever metal base with a circular floor ring and footrest bar finishes the look with a contemporary edge. Upholstered in your choice of COM. Made in the USA.

PRODUCT HIGHLIGHTS

- Hardwood plywood frame for stable, warp-resistant strength
- Solid deck seat for a firm, durable sit
- High-density foam cushioning for lasting support and shape retention
- Curved wraparound plain backrest for comfortable support
- Cantilever metal base with floor ring for contemporary style
