

Sterling Series, Chin Up Attachment (For VKR)

SKU: **GG-STER-137**

Upgrade your setup for complete upper body training, the Gym Gear Sterling Series Chin Up Attachment is designed to fit the Vertical Knee Raise Frame. When added, it transforms the unit into a full Chin / Dip / Knee Raise station, offering a versatile strength platform for gyms and training facilities. Ideal for targeting the upper body and core, this attachment supports a wide range of exercises, including chin-ups, dips, and leg raises, making it a smart addition to any strength zone.

Key Features

- Compatible with the Sterling Series Vertical Knee Raise Frame
- Creates a full Chin / Dip / Knee Raise training station
- Supports a wide variety of upper body and core exercises
- Durable, solid construction for commercial use
- Ideal for strength zones and functional training areas
