

Chicken Anti-Goat IgG Secondary Antibody

Product Details

Available Variants	1 mL (SKU:IGU-1010)
Isotype	IgY
Host Species	Chicken
Concentration	1 mg/mL
Format	Affinity Purified
Physical State	Liquid
Buffer	Phosphate-buffered saline (PBS) (pH 7.2), sodium azide (0.02%, w/v) (as an anti-microbial agent).
Production Notes	Chickens were immunized with purified, non-denatured goat IgG (containing both heavy and light chains) emulsified in Freund's adjuvant. After multiple injections, eggs were collected from hyperimmunized hens and the IgY fraction purified from the yolks. Anti-goat IgG's were affinity-purified over a column conjugated with purified goat IgG (whole protein).
Species Reactivity	Goat
Immunogen	IgG
Specificity	There is no detectable cross-reactivity with rabbit, human or mouse IgG
Quality Control	Antibodies were tested for specificity using double-immunodiffusion assays in agarose.
Storage	Store at 4°C in the dark. Under these conditions, the antibodies should have a shelf life of at least 12 months (provided they remain sterile). For longer storage periods, dilute the antibodies with sterile glycerol and store at -20°C. Do not freeze these antibodies unless you want to store them for longer periods of time.
Country of Origin	United States

Shipping	Ice packs
Usage Statement	These antibodies are to be used as research laboratory reagents and are not for use as diagnostic or therapeutic reagents in humans.
