

Fluoresceinated Chicken Anti-Rabbit IgG Secondary Antibody

Product Details

Available Variants	1 mL (SKU:IRF-1010)
Conjugate	FITC
Isotype	IgY
Host Species	Chicken
Concentration	1 mg/mL
Format	Affinity Purified
Physical State	Liquid
Buffer	Phosphate-buffered saline (PBS) (pH 7.2), sodium azide (0.02%, w/v) (as an anti-microbial agent).
Production Notes	Chickens were immunized with purified, non-denatured rabbit IgG (containing both heavy and light chains). Eggs were collected from hyperimmunized hens and the IgY fraction purified from the yolks. Anti-Rabbit IgG's were affinity-purified over a column conjugated with purified rabbit IgG (containing both heavy and light chains) and then conjugated with fluorescein isothiocyanate.
Species Reactivity	Rabbit
Immunogen	IgG
Specificity	There is no detectable cross-reactivity with goat, human or mouse IgG.
Quality Control	Antibodies were tested for specificity using double-immunodiffusion in agarose and for non-specific binding using cryostat sections of unfixed embryonic chick tissues.
Storage	Store at 4°C in the dark. Under these conditions, the antibodies should have a shelf life of at least 12 months (provided they remain sterile). For longer storage periods, dilute the antibodies with sterile glycerol and store at -20°C. Do not

freeze these antibodies unless you want to store them for longer periods of time.

Country of Origin

United States

Shipping

Ice packs

Usage Statement

These antibodies are to be used as research laboratory reagents and are not for use as diagnostic or therapeutic reagents in humans.
