Immunogen	Semaphorin 3F synthetic peptide (coupled to carrier protein) corresponds to amino acids from the C-terminal region of human Sema-3F. This sequence is highly conserved in rat and mouse Sema-3F, and has low homology to other semaphorin family members.
Specificity	The antibody detects a 95 kDa* protein corresponding to the apparent molecular mass of Sema-3F on SDS-PAGE immunoblots of adult mouse brain and liver.
Molecular Weight	95
Quality Control	Western blots performed on each lot.
Storage	Storage at -20°C is recommended, as aliquots may be taken without freeze/thawing due to presence of 50% glycerol. Stable for at least 1 year at -20°C.
