

Anti-Sox2 (Lys-119), methyl-specific Antibody

Product Details

Available Variants	100 µL (SKU:SP5531)
Conjugate	Unconjugated
Isotype	IgG
Gene Name	SOX2
Host Species	Rabbit
Format	Antigen Affinity Purified
Physical State	Liquid
Buffer	PBS + 1 mg/ml BSA, 0.05% NaN ₃ and 50% glycerol
Applications	ELISA, ICC, WB
Dilution Ranges	WB: 1:1000 ICC: 1:100
Species Reactivity	Chicken, Frog, Human, Mouse, Rat
Immunogen	Methylated-Sox2 (Lys-119) synthetic peptide (coupled to carrier) corresponding to amino acids surrounding Lys-119 in mouse Sox2. This site is well conserved in rat and human Sox2, and has high homology with the conserved site in Sox1 (Lys-127) and Sox3 (Lys-145), but low homology to other Sox family members.
Specificity	The antibody was cross adsorbed to unmethylated Sox2 (Lys-119) peptide before affinity purification using methylated-Sox2 (Lys-119) peptide. This antibody detects a 34 kDa* protein on SDS-PAGE immunoblots of mouse F9 stem cells, as well as human Sox2 recombinant protein that was methylated by Set7 methyltransferase.
Molecular Weight	34
Quality Control	Western blots performed on each lot.
Storage	Storage at -20°C is recommended, as aliquots may be taken without freeze/thawing due to presence of 50% glycerol. Stable for at least 1 year at

-20°C.

UniProt ID P48432

Country of Origin United States

Shipping Blue Ice

Expiration After date of receipt, stable for at least 1 year at -20°C.

Usage Statement For research use only. Not intended for therapeutic or diagnostic use. Use of all products is subject to our terms and conditions, which can be viewed on our website.

Post Translational Modification Type Methylated

Post Translational Modification Residue Lys-119

Product Images

Western blot image of human Sox2 recombinant protein untreated (lanes 1 & 3) or treated with Set7 methyltransferase to methylate Lys-119 (lanes 2 & 4). The blot was probed with mouse monoclonal Sox2 (lanes 1 & 2) and rabbit polyclonal anti-Sox2 (Lys-119) methyl-specific antibody (lanes 3 & 4).

Immunocytochemical labeling of methylated Sox2 in aldehyde fixed and NP-40 permeabilized human NCI-H446 lung carcinoma cells. The cells were labeled with rabbit polyclonal anti-Sox2 (Lys-119) methyl-specific (SP5531). The antibody was detected using goat anti-rabbit DyLight® 594.
