Immunogen	Phospho-TRPM7 (Ser-1569) synthetic peptide (coupled to carrier) corresponding to amino acids surrounding Ser-1569 in human TRPM7. This site is well conserved in rat and mouse TRPM7, and is conserved in TRPM6 (Thr-1724) however the site is threonine instead of serine. This site has no homology to other TRPM family members.
Specificity	The antibody was cross-adsorbed to unphosphorylated TRPM7 (Ser-1569) then affinity purified using phospho-TRPM7 (Ser-1569) peptide. This antibody detects a 220 kDa* protein on SDS-PAGE immunoblots of human MDA-MB-231 stimulated with calyculin A and rat PC12 cells, as well as detects a 70 kDa autophosphorylated recombinant kinase domain of human TRPM7. These reactivities are not observed after lambda phosphatase treatment to dephosphorylate TRPM7.
