Solar Panel Caddy – Solar Module Lifting & Carrying Tool

View product on palletsandbins.com

PRODUCT OVERVIEW

PLEASE NOTE: Solar panels with a thickness of 32mm or less will require the Panel Caddy Spacer to be added in order for the tool to work properly. (This is a removable accessory.)

The Solar Panel Caddy is designed to assist with the lifting and carrying of solar panels on any job site. Built for solar installers working on rooftops or ground-mount systems, it reduces body strain, lowers the risk of dropped panels, and makes ladder carries significantly safer. The gravity-fed grip locks securely under the panel lip and evenly distributes pressure on both sides to prevent flexing and micro-fracturing.

Key Features

- **Gravity-Fed Grip** – Automatically locks under the panel lip for a secure, hands-free hold
- **Safety Block** – Catches the panel frame if your grip slips before you're ready to release
- **Padded Interior** – Protects glass from scratching during carry
- **Ergonomic Rubber Handle** – Reduces muscle fatigue and allows you to face the ladder while climbing
- **Compatible with Panel Caddy Spacer** – Add the optional spacer to handle panels as thin as 28mm

Built for the Job Site

Whether you're on a rooftop install or a ground-mount solar farm, the Solar Panel Caddy reduces the physical grind of moving modules and helps your crew work safer. Proudly assembled in Boise, Idaho, USA by Solar Tools USA.
