

Anti-Nuclei Recombinant Chicken Chimeric mAb (BSA and Azide free)

Product Details

Available Variants	100 µL (SKU:78-611-CF)
Conjugate	Unconjugated, Carrier Free
Isotype	IgY
Clone	235-1
Gene Name	Marker for human cells in xenographic research
Host Species	Chicken
Concentration	Lot dependent: provided at 0.6-1.0 mg/mL
Format	Purified by affinity chromatography
Physical State	Liquid
Buffer	PBS
Production Notes	This recombinant antibody is a chimeric antibody created by replacing the mouse heavy and light constant regions of clone 235-1 with chicken IgY heavy and light constant regions. As such this antibody retains the same binding performance as the original clone 235-1 but can be detected using standard anti-chicken secondary antibodies allowing flexibility for multiplexing applications. This antibody is expressed recombinantly in mammalian cells and then affinity purified from the cell culture media.
Applications	ELISA, ICC, IHC
Dilution Ranges	IHC: 1:100-1:500 ICC: 1:100-1:1000
Species Reactivity	Human
Immunogen	Human cell homogenate.

Specificity	Does not cross-react with Arl13a (based on KO validation results)
Quality Control	Each new lot of antibody is quality control tested by immunocytochemistry on HeLa cells and confirmed to colocalize with DAPI.
Storage	Aliquot and store at $\leq -20^{\circ}\text{C}$ for long term storage. For short term storage, store at $2-8^{\circ}\text{C}$. For maximum recovery of product, centrifuge the vial prior to removing the cap.
Country of Origin	United States
Shipping	Shipped on ice packs
Expiration	24 months from date of receipt
Usage Statement	These antibodies are to be used as research laboratory reagents and are not for use as diagnostic or therapeutic reagents in humans.
